- Psi Chi Honor Society
- 3.78 GPA

A.A. LIBERAL ARTS | MAY 2010 | ROCKLAND COMMUNITY COLLEGE

- Phi Theta Kappa Honor Society
- 3.9 GPA

Applications Built

PERSONAL PERSCRIPTION PLANNER

- This app is designed to track user medications and alert them via text message to take them. After adding a medication to your prescription list, the app will query a drug database and check for possible conflicts. Text message alerts will be sent to the user to remind them to take medications.
- This is a react app, with a node.js/express server and uses mongo for the database. Twilio api is used to send text messages and newsapi.org is used for the news feed. NPM packages include axios, moment, bcryptjs, cheerio, cron, dotenv, mongoose, passport, and validator.

- GitHub: https://github.com/taw1313/team-merge-p3

NOPE!

- This is app allows users to add restaurants to the map, write reviews and update busy status. Icons on the map will be displayed in either red or green depending on the busy status of the restaurant.
- This is a multi-page app that has an node.js/express server and uses mongo for a database. The map canvas and the geocoding is powered by google api.

THE CLICKY GAME

- This is a game where the player is to select a unique image. After every selection the images will shuffle. Clicking on the same image twice will end the game. Select 12 unique images in a row to win.
- This is a react app.
